

SCHOOL RECYCLING PROJECT: CONTRIBUTION AGREEMENT

Purpose:

Most of our Missoula schools lack adequate funding to provide recycling. Students are told about recycling, yet if the school doesn't recycle, then an unspoken message is sent that it really doesn't matter. To implement and encourage the good habits of recycling, our schools need help. Your contribution will help fund (1) educational in-service programs, (2) bins for school recycling (3) regular pickups of school recyclables. (4) program costs such as Home Resource non-profit hosting costs (2%), advertising, and printing.

Program Management:

If you wish to fund a particular school and that school is already funded, your contribution will help another school in the Missoula Area. Missoula Valley Recycling (MVR) is spearheading the program under the sponsorship of the Home Resource. A board consisting of parents, educators, and a local businessperson will determine how the funds are distributed.

Deliverables:

Missoula Valley Recycling will (with permission) publicly recognize your financial support at the participating school, and on any other forms of public communications. MVR also will provide all contributors with a bi-annual progress report for the periods covered by the supporting contribution. Please make checks payable to Home Resource - Recycling in Schools.
